T4 STEM Summer Academy Fellowships are available for teachers who

- have Master’s degrees in STEM fields and/or education,
- are science, technology, engineering, or mathematics teachers,
- are interested in high school equivalency programs,
- are interested in promoting teaching as a profession,
- are available June 17 through July, 2007,
- want to earn $1,500 stipend!

What? Where? When?

- 80 chosen high school students may choose to take courses through Youngstown State University, Kent State University regional campuses in Ashtabula or Trumbull counties, or Jefferson Community College
- T4 STEM Summer Academy begins June 17th with a supervised two-week residency in the dormitories on the Youngstown State University campus (June 17 – June 29)
- Students continue with classes at their chosen college or university through July
- Students will complete coursework in September/October -- after the start of High School classes
- **Academy Fellows will:**
  - Work with university and college faculty developing innovations in pedagogy and educational delivery systems for the residential and follow-up components
  - Mentor students after the 2-week residency through web-based interaction during the summer
  - Mentor students during the Fall as coursework concludes

A limited number of Academy Fellowships are available. To apply:

- Send an e-mail with your resume and contact information to: stemacademy@YSU.EDU
